Sefar Screen Printing Accessories

Stretching clamps, pneumatic control units and measuring devices
The progressive build-up of the clamping pressure and the lifting function of the SEFAR® 3A stretching system enhances its performance by reducing the reject rate. Why? The mesh can’t slip out the jaws and eliminates friction between fabric and frame. This means you are able to work with faultless, evenly-stretched screens. Day after day. Another plus point: The SEFAR® 3A clamps are suitable for all screen printing mesh – regardless of screen size, materials or thread count. All of this with ease of handling and quick adjustments to the next frame size.
Integrated lifting function – ease of use, no worries

**Product features**
- Modular single or dual-circuit pneumatic system
- Progressive build-up of the jaw pressure
- Raising and lowering function of the jaws
- Jaws having widths of 150 and 250 mm
- Stroke length of 75 or 145 mm
- Max. screen tension of 45 N/cm
- Easy opening and closing of the clamping jaws
- Robust construction

**Customer benefits**
- Rapid conversion to different frame formats and no restriction on frame sizes
- No slippage of the mesh from the clamps
- Precise and kind-to-the-mesh stretching process
- Simple and practical operation without excessive force
- Consistent reproduction of high tension values obtainable
- Pre-tensioning of the frame guarantees uniform tension values
- Suitable for synthetic and wire mesh
- Minimum maintenance necessary

**Lifting function**
The mesh is raised during the stretching process. This prevents undesirable friction between the frame and mesh, and the mesh is stretched out uniformly.
Economic solutions for all frame sizes

**SEFAR® 2 – Stretching clamps**

We provide with SEFAR® 2 a strong and economic stretching system. SEFAR® 2 makes its mark as a user-oriented, lightweight and rugged clamp for stretching synthetic mesh on all frame sizes.

---

**Product features**
- Modular single or dual-circuit pneumatic system
- Progressive build-up of the jaw pressure
- Quickly adaptable to different frame sizes
- Clamping jaws having widths of 150 and 250 mm
- Stroke length of 70 or 140 mm
- Max. mesh tension of 40 N/cm
- Easy opening and closing of the clamping jaws
- Robust construction

**Customer benefits**
- Economic
- Time saving adaption to different frame sizes
- No slippage of the mesh from the clamps
- Simple and practical operation
- No restriction on frame sizes
- Constant tension values obtainable
- Pre-tensioning of the frame guarantees uniform tension values
- Minimum maintenance

### Single and dual-circuit Sefar pneumatic systems

For pneumatic stretching systems there are two possibilities to allocate the air supply: Single or dual-circuit systems – complementary alternatives for optimal, balanced tension for all types of mesh and frame sizes. Single-circuit systems are recommended for frames having side lengths up to 150 cm. For frames having sides longer than 150 cm dual-circuit systems are recommended.

▪ Serial interface to SEFAR® Tensochek 100 |
| | Customer benefits | Tensioning to precise levels  
▪ Increased productivity and process reliability |
SEFAR® Tensocheck 100 is an electronic gauge for monitoring screen tension. Its outstanding advantages: Its excellent value for money and ease of use without requiring previous experience. SEFAR® Tensocheck 100 is also available having a serial port for connection to SEFAR® 51i. Your advantage: Fully automatic, precise tensioning at preselected values in N/cm (Existing devices not having an interface are not able to be converted).

Calibration control plate for SEFAR® Tensocheck 100 with certificate (Optional): Ensure a maximum process control by regular in-house checking of the accuracy. The SEFAR® Tensocheck 100 only needs to be sent to the Sefar technology center for readjustment if the check should result in a measured value outside the tolerance limits – and that is rare.

Good to know: The specifications of the ISO 9001 quality system require a periodic certification of the calibration control plate at an accredited measurement institute. The user must have these recalibrations carried out locally. There are appropriate institutions in your area worldwide.
## Highest process safety

### Sefar measurement devices

**SEFAR® Tensocheck 100**  
Universal, ergonomic and compact

<table>

| Dimensions    | 80 x 95 x 115 (mm)  
| Weight        | 1.01 kg (With battery)  
| Display range | 10 – 50 N/cm  
| Resolution    |  
| Range <30 N/cm, ±0.2 N/cm  
| Range >30 N/cm, ±0.5 N/cm  
| Tolerance measurement range |  
| 10–19.8 N/cm, ±0.4 N/cm  
| 20–29.8 N/cm, ±0.6 N/cm  
| 30–39.5 N/cm, ±1.0 N/cm  
| 40–50.0 N/cm, ±1.5 N/cm  
| Glass reference plate |  
| In order to achieve reproducible results in the stretching process, a periodic review of the zero point of the device is recommended. By using the glass reference plate this monitoring can be carried out independently. |

### Product features

- The clear digital display having 10mm-high lettering is easy to read even from a distance
- High accuracy: Up to 29.8 N/cm the resolution is 0.2 N/cm, over that, about 0.5 N/cm
- The highest process reliability and reproducible results

### Customer benefits

- Because of the large display area, overall usability
- User-friendly operation
- Independent monitoring of the zero position using the glass control plate
- Measurement unit selectable by (N/cm or mm)
- Automatic shutdown increases battery life
- More accurate values obtainable via the interface to the SEFAR® 51 control unit
- Optional with interface to SEFAR® 51 control unit
Sefar worldwide

Sefar is the leading manufacturer of precision fabrics from monofilaments for the screen printing and filtration market. Sefar products are used in a wide variety of industries, ranging from electronics, graphics, medical, automotive, food and pharmaceutical applications to aerospace, mining & refining and architecture. With its profound understanding of the applications Sefar helps its customers to achieve optimum results in their industrial processes. Subsidiaries and fabrications centers around the world provide local technical service for the broad range of solutions offered by Sefar.
