Glass with integrated SEFAR® Architecture VISION fabric changes between transparency and reflection and can mirror the environment in different ways. This layout was chosen by the architects as they wanted a design using glass which has a texture resembling a metallic look.

The laminated glass fins are installed in a spider system and supported by 4 points in the corner. The fins are not applied on the complete facade, they just give an accent of decoration. With the special play of light structures also shade is achieved.

**Fabric**
SEFAR® Architecture VISION AL 260/25

**Size/Quantity**
172 m²

**Project/Location**
GINZA SIX, Tokyo (JP)

**Building type**
Shop and office

**Architects (joint venture)**
Yoshio Taniguchi & Associates (JP) and Kajima Design (JP)

**General Contractor**
Kajima Corporation (JP)

**Facade builder**
Asahi Building-Wall Co., Ltd., Singapore (SG)

**Glass manufacturer**
Singapore Safety Glass Pte. Ltd., Singapore (SG)

**Foil**
SentryGlas® supplied by Kuraray/DuPont
