[ProjectInfo]

Primehouse Restaurant is located in a trendy part of Brooklyn, New York on a street with many compelling restaurants to choose from. The design team at CRCD selected the SEFAR® Architecture IE-200-S mesh as a series of street level façade-sails to draw attention to Primehouse while reducing glare from sunlight into the space. Installed with a simple and sound aluminum framing systems, the IE-200-S adds a decorative flair even at night when lit with LED mounted below. The hearty, weatherproof and tamper proof 100 % Teflon fabric is ideally suited for this application in both daylight and night time visual impressions, luring customers to eat at Primehouse.
