

Rollable Sun Awnings

Exterior Light

Projects. SASSUS develops and designs sun blinds for use in both private and public settings. Whether the system you require is a sun canopy, umbrella or for use in gastronomy – they all maximize the synergy created by combining functionality, design, a flair for innovation and hand-crafted quality.

JADEN – the automatically retractable sun awning – unites futuristic technology, superb design and exceptional quality in one unique sun protection system. Radio-controlled by independent weather reporting stations, JADEN reacts to local conditions, automatically extending when the sun shines and retracting when the wind speed exceeds 50km/h (31 mph). Owing to a special coating technology, every drop of rain washes the awning.

Concept / Design. Rollable canopy constructions by SASSUS are based on the use of sophisticated pre-cut membranes and high quality, hand finished workmanship.

Construction. The high-grade steel construction in combination with the durable, water-resistant, coated SEFAR Fabric EL-35-T1 (previous notation AR 24-25) ensures high resilience and a low mass per unit area. The seams are fully impregnated and waterproof. Sefar Exterior Membranes are the first choice for individual object shading.

Project / Location: Private Object / Adventure Gardens, Langenlois, Austria

Engineering: SASSUS GmbH, Vienna, Austria, www.sassus.at

Implementation:

Hermann Meisel GmbH, Pinsdorf, Austria, www.planen-meisel.at

Vertrieb: SASSUS GmbH, Vienna, Austria, www.sassus.at

Fabric: SEFAR® Architecture **EL-35-T1** (previous notation AR 24-25)
