SentryGlas® supplied by Kuraray/DuPont

[ProjectInfo]

IFC Jersey provides a world-class business hub providing environmentally sustainable Grade A office and retail space in the heart of St. Helier. These are partly rented but also used by the builders themselves.

Half of the 3'300 m² facade is equipped with floor-to-ceiling windows laminated with SEFAR® Architecture VISION AL 260/50B fabric. Coated on both sides with aluminum, this fabric has 50 % open area for optimal viewing and ideal thermal values and reflection.

The fabric is located on the inner side of the laminated safety glass. On the outer panes, an edge cover was applied by screen printing.
