Office building, bank

Architect

Make Architects, London (UK)

Glass manufacturer

BGT Bischoff Glastechnik AG, Bretten (DE)

Foil

SentryGlas® supplied by Kuraray/DuPont

[ProjectInfo]

SEFAR® Architecture VISION is a fabric made of black plastic fibers, coated with metals and laminated into safety glass. Glass conveys modernity and lightness. Glass with integrated SEFAR® Architecture VISION fabric changes between transparency and reflection and can mirror the beauty of a place in many ways. Here it is used for wall cladding, including in the area around the elevators.
