Corporate Office, Richmond, VIC (AU)

Construction type

Balustrades

Architect

Technè Architecture + Interior Design, Carlton (AU)

Glass manufacturer

Glassworks (Aust) Pty Ltd. Dandenong (AU)

[ProjectInfo]

Owners set out to upgrade the interior of the A-grade building, comprising 11'000m² of adaptable spaces. The most striking elements are the complete 90 m² of balustrading for the four upper levels using SEFAR® Architecture VISION laminated glass with complementing thin brass edging and bronze capping to secure the glazing.

Tying in with the subtle hues and elegance of this project, Printed Gold Vision fabric in 140/50 was selected on Low Iron extra clear glass. This balustrade blends in beautifully with the other strong masonry elements making up the interior including soft bronze, oak and charcoal tones.
