

Fluid Bed Dryer Bags

Sefar is one of the leading manufacturers of ready-made bags for fluid bed dryers, filters and accessories.

Product Features

introduced so far:

Sefar Filter Solutions for Fluid Bed Dryer

Fluidized bed technology is used in many applications such as the formulation process in the pharmaceutical industry or the production of fine chemical powders by mixing, agglomeration, granulation, sizing, drying, coating or micronizing.

Over the last 25 years Sefar focused on smaller reactors used in the chemical, food and pharmaceutical industry where fluid bed drier bags (FBDB) are commonly used. Together with leading equipment manufacturers such as Glatt or Bosch Hüttlin, Sefar developed the highest quality standards available on the market.

Many features enhancing the security and performance of fluid bed dryers have been

- Unique welded seams for minimal particle loss
- ATEX specified filter cloth together with electrical conductivity testing on finished bags to avoid explosion due to electrostatic discharges
- Unique customizable labeling for excellent traceability and identification
- Various cap designs used in different equipment models
- All skirt options available for easy installation (cord, zipper etc.)

Whether our customers work with top spray or bottom spray, single sleeves or multi tubes, octopus bags or bonnet bags, Sefar is the best partner for suppling antistatic FBDB.

Twin shaker or D-type FBDB

Fluid bed dryers are used for drying, agglomerating or coating. Sefar is one of the leading manufacturers of customized filters in this industry, making us the perfect partner for your spare parts.

Sefar filter solutions for OEM

Our products meet the specific needs of these filtration applications and are successfully running all over the world on all known fluid bed dryer brands and OEMs, such as:

.....

Glatt GEA Powrex Fluid Air

(Aeromatic)

(Bosch)

Romaco

(Innojet)

Freund Oystar Bectochem Lödige FPS (Foodpharmasystems) Vector Hüttlin

Tapasya

Diosna

Filter media technology

O'Hara

Technologies

Sefar offers a complete range of special antistatic fabrics for the demanding application of fluid bed dryers. The fabric range has been adjusted to the various application requirements. Sefar fabrics are designed for an optimal balance between efficient particle retention and high throughput always guaranteeing perfect static dissipation.

SEFAR TETEX MULTI 07-100-150 WA PHARMA

.....

Specially made for Life Science Industries

Sefar controls every crucial production step from yarn production to the ready-to-use filters making possible a complete traceability of all critical parts.

Our unique market position in **life science** enables us to supply products to customers that meet all required quality levels and compliances.

Sefar has perfected its manufacturing processes to meet the needs of the pharmaceutical industry. Our exclusive GMP compliant filter products are manufactured in our cleanroom (GMP class D or ISO class 8) following strict GMP guidelines (EC 2023/2006).

Sefar customers are able to choose between three different quality levels to perfectly serve their needs in terms of cost-benefit ratio.

The main features when choosing our PHARMA GMP level:

- FDA CFR 177
- ISO 9001
- Conductivity tested
- ATEX Directive 2014/34/EU & TRGS

727

Single packaging

- Customized Pharma labeling
 - Traceability
